Personal Insurance for  
Protecting People

We make every step easy.

You have been given this by a  
friend who wants you to benefit!

You have been given this by a friend who wants you to benefit!

The person that has given this to you, has just saved on their premiums, AND now have better policies that have a better chance of paying at time of claim.

### The reasons you won't want to see me!

**I'm too busy** – Most people are very busy nowadays. I understand this and that's why I will meet you when and where it is easy for you.

**I already have insurance and I am happy with that** – Most people I see have insurance, but how will this work for you at time of claim? Most people I see don't really understand the small details of their insurance policies.

**It's too hard** – That's my favourite. Simply I make it easy. Easy to meet, easy to understand and easy to claim.

**I get a discount through my bank** – Some banks do offer discounts. We, however, will beat bank premiums but more importantly, will provide much better cover with fewer loopholes.

Do you really know if you're covered?

### 700 Claims and Counting...

I take charge of claims for my clients from paperwork to approval and have had over 700 claims approved in 18 years.

Over the years I have had only 32 claims declined by insurers. However out of those, I have over-turned 31 into approvals. I will be working for you if ever this happens.

Daniel Cropp  
director, ensure-nz

# Ask yourself

1. Do you want the best cover for you and your family?
2. Would you like to save money on your premiums?
3. Are you unsure on exactly how your current cover works for you and your family?
4. Would you like someone to manage all your claims?
5. Can you spare 30 min to meet and have a chat?

As mentioned, the person that gave you this card wants you to get the answers to the above. I will call you within a week and let's get together for a chat.

"Take the time, it's better for you, and your family"
